## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-423-LA-2, ASLBP No. 98-743-03-LA]

### Northeast Nuclear Energy Company; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 F.R. 28710 (1972), and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717, 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to preside over the following proceeding.

Northeast Nuclear Energy Company  
Millstone Nuclear Power Station, Unit No. 3

This Board is being established pursuant to a petition to intervene submitted by the Citizens Regulatory Commission. The petition opposes a license amendment which would add a new sump pump subsystem to address groundwater leakage through the containment basemat. The NRC staff has determined that the issuance of a license amendment to the Northeast

Nuclear Energy Company for the Millstone Nuclear Power Station, Unit No. 3 would involve no significant hazards considerations. The notice was published in the **Federal Register** at 63 FR 19964, 19974 (April 22, 1998).

The Board is comprised of the following administrative judges:

Thomas S. Moore, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. Richard F. Cole, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. Charles N. Kelber, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

All correspondence, documents and other materials shall be filed with the Judges in accordance with 10 CFR 2.701.

Issued at Rockville, Maryland, this 1st day of June 1998.
